NAME

t1ascii – convert type-1 font from binary to ASCII

SYNOPSIS

t1ascii [*input* [*output*]]

DESCRIPTION

t1ascii converts Adobe type-1 font programs in PFB (binary) format to PFA (hexadecimal) format. If the file *output* is not specified output goes to the standard output. If the file *input* is not specified input comes from the standard input. In this way **t1ascii** can be used as a filter.
