NAME

sjisconv – convert a TeX document in SJIS encoding into 'preprocessed' form.

SYNOPSIS

sjisconv < *infile* > *outfile*

DESCRIPTION

SJIS encoding for Japanese uses the characters `{`, `}`, and `\` which have special meanings in TEX documents.

After processing a LATEX 2_ε document which contains SJIS characters with **sjisconv** you need not care about these special characters.

This filter is part of the **CJK** macro package for LATEX 2_ε.
