2015.04.08

1 Introduction

This is collection of various packages historically placed in a bundle and maintained by Sigitas Tolušis.

2 Usage

- **cuted.sty, v1.5 2012/10/04** – place some material page width wide at any place on twocolumn page with existing text reformatted under inserted material;
  `TODO: add optional rules to separate from text;`

- **floatpag.sty, v1.1 2012/05/29** – set pagestyle for floats page;

- **flushend.sty, v3.0 2015/04/08** – balance page in twocolumn mode;
  `(2014/03/03): totally rewritten with new algorithm to support footnotes,`
  `top floats and column break before one line section title.`
  `(2014/04/24): bugfix version;`
  `(2015/03/27): bugfix version with improved funcionality:`
  `- spreaded or fixed right column height;`
  `- optional old algorithm for backward compatability;`

- **marginal.sty, v1.1 2012/05/29** – use enlarged room for marginal inserts;

- **midfloat.sty, v1.1 2012/05/29** – insert onecolumn stuff in twocolumn page;
  `TODO: extend to work on both columns;`

- **stabular.sty, v2.0 2014/03/20** – use modified tabular environment;
  `(2014/03/20): removed extra stuff and left only possibility to`
  `break on page boundary;`
  `added tabular variant from array package;`

- **stfloats.sty, v1.1 2012/05/29** – enable enriched floats output mechanism;

- **texsort.sty, v1.1 2012/05/29** – sort numerical values;
  `TODO: extend (rewrite) to support alphnanumerical values for sorting.`

Just load any of the provided packages in the standard way: `\usepackage{`⟨*package*⟩`}` or `\RequirePackage{`⟨*package*⟩`}`.

To read documentation: `texdoc` ⟨*package*⟩.
